3D CRYSTALS - Customised images laser-engraved deep INSIDE beautiful optical crystal awards, trophies and prisms.

State-of-the-art laser technology is used to create unique and highly customisable products that are perfect as corporate gifts, promotional products, trophies & awards, incentives, desk pieces, giftware and memorabilia.

What sets this patented process apart from other engraving techniques is the ability to include any 3-dimensional image (such as a 3D model, logo or text) as well as standard 2-dimensional artwork. Experienced 3D designers work in consultation with customers to create incredible 3-dimensional models.

With a minimum order quantity of one, anyone can afford an awe-inspiring 3D crystal that will remain a talking point for years to come.
